The therapeutic potential of Indoleamine 2.3-dioxygenase in kidney transplantation

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus, prof. dr. E. Sterken
en volgens besluit van het College voor Promoties

De openbare verdediging zal plaatsvinden op

woensdag 8 januari 2014 om 11.00 uur

door

Diana Vavrincová-Yaghi

geboren op 21 maart 1983
te Bratislava, Slowakije

Promotor:

Prof.dr. R.H. Henning

Copromotores:

Dr. M. Sandovici

Dr. L.E. Deelman

Dr. M.A. Seelen

Beoordelingscommissie:

Prof. dr. J.L. Hillebrands

Prof. dr. C. van Kooten

Prof. dr. W.J. van Son

Paranimfen:

Roelien A.M. Meijering

Sjoerd W. Landheer

Table of contents

Chapter 1	Introduction and aims of the thesis	9
Chapter 2	Gene therapy with adenovirus-delivered indoleamine 2,3-dioxygenase improves renal function and morphology following allogeneic kidney transplantation in rat	27
Chapter 3	Local gene therapy with adenovirus-delivered Indoleamine 2,3-dioxygenase ameliorates chronic kidney transplant dysfunction and promotes tolerance	53
Chapter 4	The effects of adenoviral overexpression of Indoleamine 2,3-dioxygenase in bone-marrow derived rat dendritic cells on T cell proliferation and phenotype	79
Chapter 5	Early posttransplant tryptophan metabolism predicts long-term outcome of human kidney transplantation	103
Chapter 6	Summary and future perspectives	127
Samenvatting	Summary in Dutch	145
Zhrnutie	Summary in Slovak	149
Acknowledgement, dankwoord, pod'akovanie	155
